

Standard book trim size is 7.44" x 9.69" (inches). Please keep all important image elements 1/4" inside trim dimension to allow room for variation in trim size. Extend background image 1/4" beyond trim to allow for variation in image centering. Color matching is not exact. CYMK works best. Trim size and print coverage area can vary.

Spine width can vary depending on the number of pages and the type of paper stock. Try to keep spine text within a 1/4" vertical band indicated in pink and extend background to 1.0" wide or more. Inquire with number of pages for exact spine width dimension if necessary.

**Universal Publishers**
